

DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding Claims 13 and 22, prior art fails to show alone or in combination that a first device residing at a first subnetwork requests a process from a second device residing at a second subnetwork, which is different from the first subnetwork through the process of broadcasting a message within the first network, converting the broadcast message to a unicast message to forward to the second subnetwork, forming a different broadcast message specific for the second subnetwork, preventing the first broadcast message from reaching the second subnetwork, receiving the second broadcast message and checking if the port number matches the second device to perform the requested process.

Regarding Claims 14, 15, 20, 21 and 23 are allowable because they depend on the allowable independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
